## TECHNICAL SKILLS

|                |                                                                                         |
|----------------|-----------------------------------------------------------------------------------------|
| Languages      | Python, JavaScript, TypeScript, Go, SQL, Java                                           |
| Backend        | Node.js, Express.js, FastAPI, Spring Boot, GraphQL, REST APIs                           |
| Frontend       | React.js, Next.js, Tailwind CSS, Redux, HTML5, CSS3                                     |
| Databases      | PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, DynamoDB                              |
| Cloud & DevOps | AWS (EC2, S3, Lambda, RDS, ECS), Docker, Kubernetes, Terraform, GitHub Actions<br>CI/CD |
| Tools          | Git, Postman, JIRA, Figma, Linux, Nginx, Webpack                                        |
| Coursework     | Data Structures & Algorithms, System Design, DBMS, Operating Systems                    |

## PROFESSIONAL EXPERIENCE

### Stripe | Software Engineer Intern

Jan 2025 – Present

- Built a **real-time payment reconciliation dashboard** using **React.js + Node.js**, reducing manual auditing time by **65%**.
- Optimized PostgreSQL query performance with indexing and query rewrites, cutting average response time from **3.2s to 0.4s** (87% improvement).
- Collaborated with a cross-functional team of **8 engineers** to ship a fraud-detection microservice serving **500K+ transactions/day**.

### Acme Corp | Backend Developer [\[Certificate\]](#)

Jun 2024 – Dec 2024

- Designed and deployed a **RESTful API** for an inventory management system serving **200+ enterprise clients** and processing **15,000+ daily requests**.
- Integrated **WebSockets** for live order status updates, improving client-reported satisfaction scores by **30%**.
- Implemented **JWT authentication** and role-based access control, reducing unauthorized access incidents by **100%** post-deployment.

### StartupXYZ | Full Stack Developer [\[Certificate\]](#)

Jan 2024 – May 2024

- Developed **12+ reusable React components** for a SaaS analytics platform, cutting UI development time by **40%**.
- Migrated a legacy monolith to **microservices architecture** on AWS ECS, improving deployment frequency from monthly to **weekly releases**.
- Wrote **90+ unit and integration tests** with Jest and Supertest, raising code coverage from 32% to **87%**.

## PROJECTS

### DevTracker — Open Source Issue Tracker [\[GitHub\]](#)

2025

Stack: [TypeScript](#) · [React.js](#) · [Node.js](#) · [PostgreSQL](#) · [Docker](#) · [GitHub Actions](#)

- Built a full-featured project management tool with real-time collaboration using **WebSockets**, supporting **500+ concurrent users** in load tests.

- ▶ Implemented **CI/CD pipeline** with GitHub Actions — automated linting, testing, and Docker image publishing on every PR merge.
- ▶ Achieved **2,000+ GitHub stars** and **80+ contributors** within 3 months of launch.

### SmartBudget — Personal Finance API [\[GitHub\]](#)

2024

**Stack:** *Python · FastAPI · PostgreSQL · Redis · AWS Lambda · Terraform*

- ▶ Designed a **serverless financial analytics API** on AWS Lambda + API Gateway with sub-**200ms p99 latency** under production load.
- ▶ Used **Redis caching** for frequently queried budget summaries, reducing database load by **70%**.
- ▶ Provisioned all infrastructure with **Terraform**, enabling one-command reproducible deployments across dev/staging/prod environments.

## EDUCATION

---

### B.S. in Computer Science

University of California, Berkeley

**GPA: 3.87 / 4.0**

2021 – 2025 (Expected)

#### Relevant Coursework:

Algorithms, Distributed Systems, Machine Learning, Database Systems, Computer Networks

## ACHIEVEMENTS & CONTRIBUTIONS

---

- ▶ **npm Package — cli-scaffold:** Published a CLI tool that scaffolds project structures from config files, reaching **3,200+ downloads**. Available at [npmjs.com/package/cli-scaffold](https://npmjs.com/package/cli-scaffold).
- ▶ **Published Research — Efficient Graph Indexing:** Co-authored a paper on **approximate nearest-neighbor search** for large-scale knowledge graphs, accepted at **IEEE ICDE 2025**. [\[View Paper\]](#)
- ▶ **HackMIT 2024 — 1st Place:** Won Best Developer Tool award among **400+ participants** for an AI-powered code review bot.
- ▶ **Google Code Jam 2024:** Ranked in the **top 2%** globally (Round 2).
- ▶ **Tech Blog — alexmorgan.dev:** Write about system design and backend engineering; articles have received **50K+ total views**.
